

Digitized Automation for a Changing World

Delta High Performance Compact Drive MH300 Series

www.deltaww.com

Compact and Intelligent

The new standard for micro drives

The automation industry today continues to face challenges such as increasing competition and rising costs. In addition to improving productivity and reducing labor, the driving force for automation is the shift to higher efficiency, optimal quality, and most importantly, flexibility and compatibility for a wide range of applications.

The MH300 series is the new generation high performance compact vector control drive that inherits Delta's drive technology with more advanced functions included for higher application flexibility -- all in a compact drive that has been reduced 71% in size.

A variety of essential functions are built-in as standard, including: PLC capacity for simple programming needs, communication slots for various communication cards, and a USB port to make data uploads and downloads fast

and easy. This saves the need for additional hardware, while providing more installation space for the power cabinet.

Other key features include: support for both IM and PM motor control for application flexibility, an STO function to ensure worry-free operation while protecting facilities from damage, and a simplified wiring process with a new screwless wiring design of terminal blocks for quick installation.

Saving space, reducing setup and wiring time, and providing high efficiency and a highly stable system, the MH300 is your key to improving market competitiveness and ensuring success.

Models Overview

Option Cards

03

Outstanding Drive Performance

Supports IM and PM Motors
High Starting Torque
Enhanced Braking Capability
Fast Response to Load Impact
Deceleration Energy Backup (DEB)

07

Stable, Safe and Reliable

Safety Standards Compliance
Enhanced Conformal Coating
Built-in EMC Filter
IP40 Models

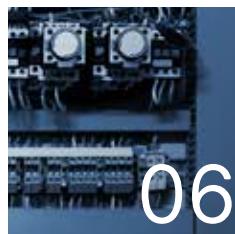

11

Wide Range of Applications

Rewinder Machines
Slitter Machines
Printing Machines
Drawing Machines
Coil Winding Machines
Machine Tools
Woodworking Machines
Textile Machines

13

Optimized Space Utilization

Compact Design
Side-by-Side Installation

06

Strong System Support

Multi-motor Control
Pulse Control
Built-in PLC
Tension Control
DC 24 V External Power
High Overload Capability
Built-in Brake Chopper
Closed-Loop Control
Various Communications

08

Easy to Install

Application Parameter Settings
Built-in USB port
Screwless Wiring of Control Terminal

Built-in 2 Option Slots

Optimized Space Utilization

Compact Design

Provides more powerful features in smaller sizes with reduction up to 71% that effectively optimizes the installation space

Note: VFD32AMH43ANSAA versus VFD150B43A

Side-by-Side Installation

Supports side-by-side installation with operating temperatures of -20°C ~ 40°C; enables highly flexible and highly efficient installation

Substantial savings in space!

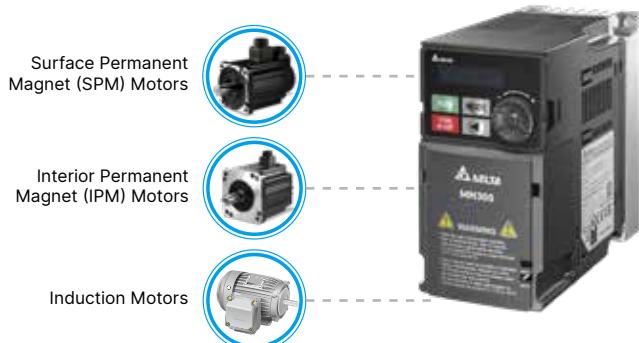

Outstanding Drive Performance

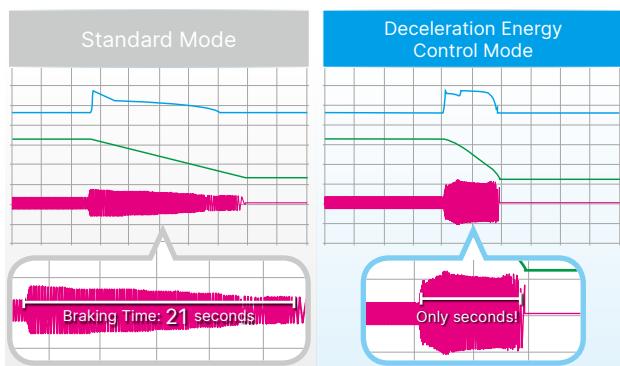

Supports IM and PM Motors

Built-in 4 independent induction motor control parameter sets and supports up to 8 independent induction motor control parameter sets

Enhanced Braking Capability

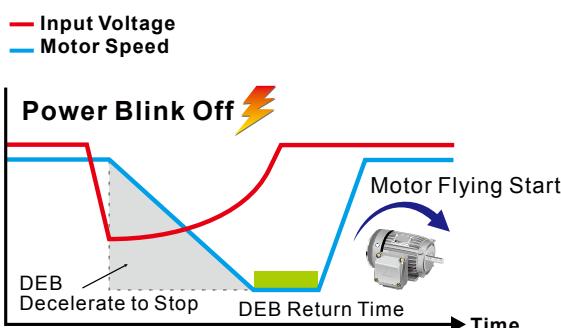

Provides Deceleration Energy Control Mode to shorten braking time by adjusting the motor speed and current, replacing break resistors

* Actual deceleration performance would depends on different system loads

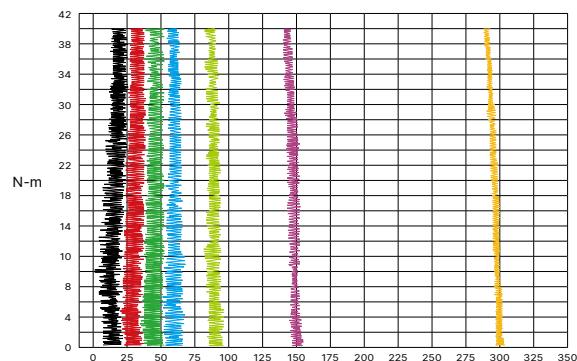

Deceleration Energy Backup (DEB)

Controls the motor deceleration to a stop when an unexpected power shut-down occurs to prevent mechanical damage; the motor will accelerate to its previous speed when power resumes

High Starting Torque

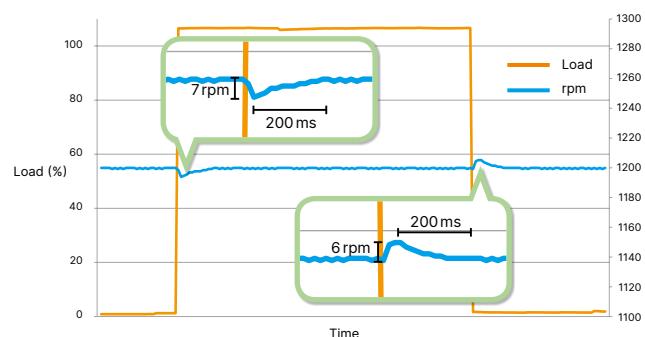

Delivers 200% high starting torque with a low speed control of 0.5Hz (sensor-less vector control)* and provides outstanding machine stability; suitable for dynamic loading applications

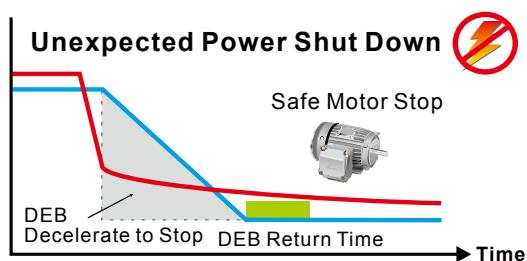

* Note: Additive PG vector control delivers 200% high starting torque with a speed control of 0Hz

Fast Response to Load Impact

Fast response to sudden load impact at speeds to ensure stable operation and high quality output

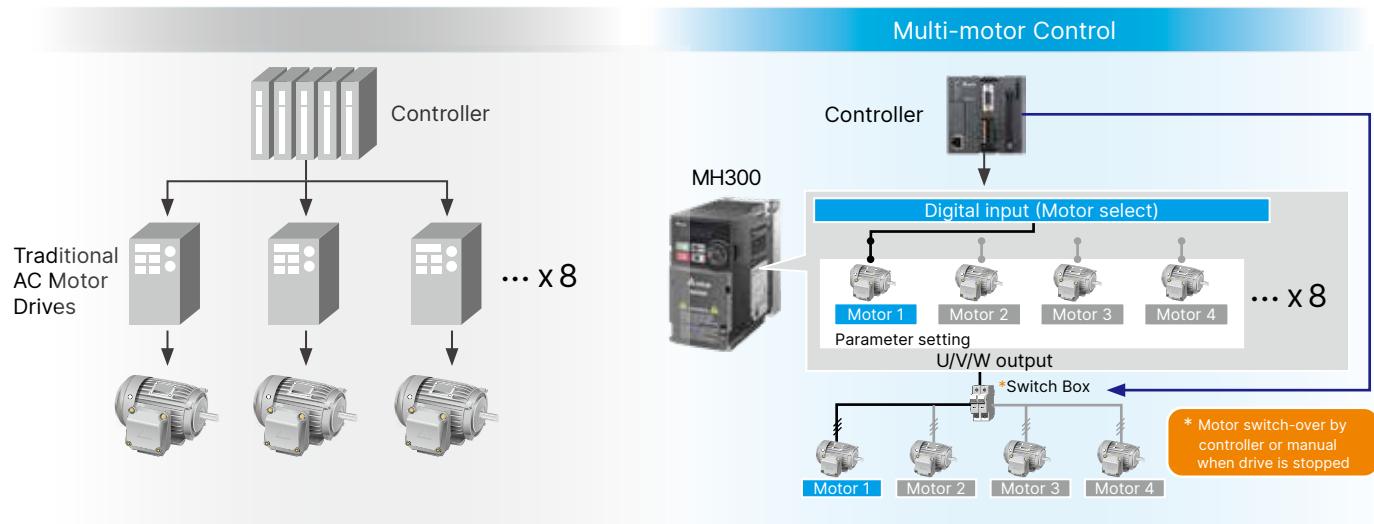

— Input Voltage
— Motor Speed

Strong System Support

Multi-motor Control

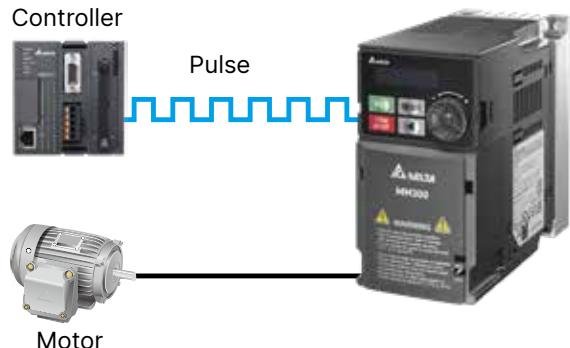

Switching control of 8 induction motors

Note: MH300 features 4 built-in independent parameters sets and through the built-in PLC program, it supports up to 8 independent parameters sets

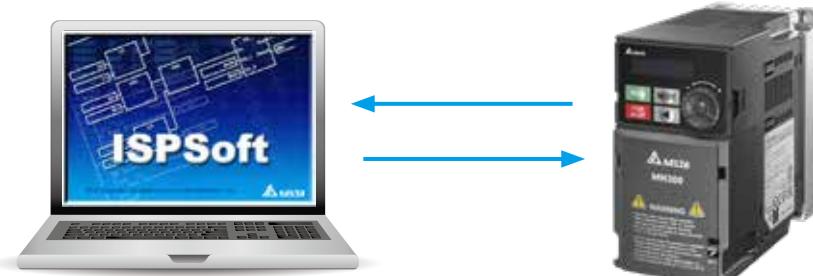

Pulse Input

Supports a dual pulse input signal from controller or a feedback signal from encoder without an additional PG card to achieve simple closed-loop control. Terminal M17 supports single pulse signal input as a frequency command

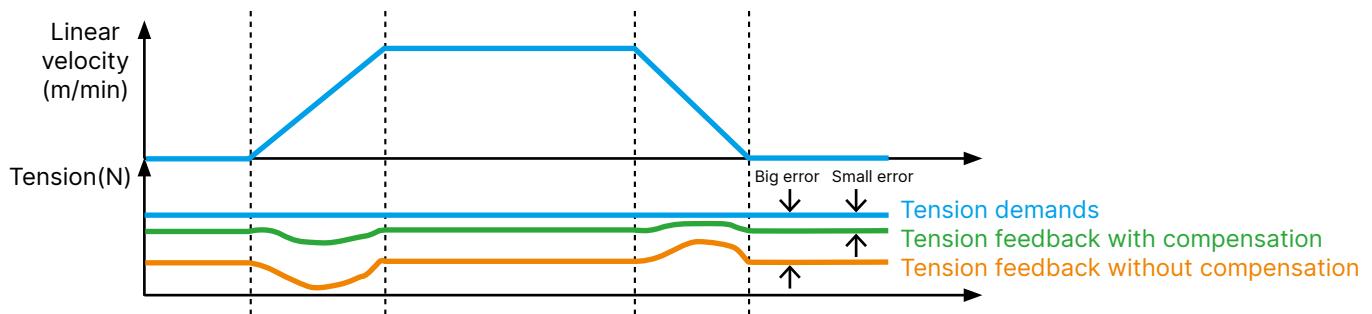

Built-in PLC

Built-in PLC capacity (5k steps) provides distributed control and independent operation via network connection

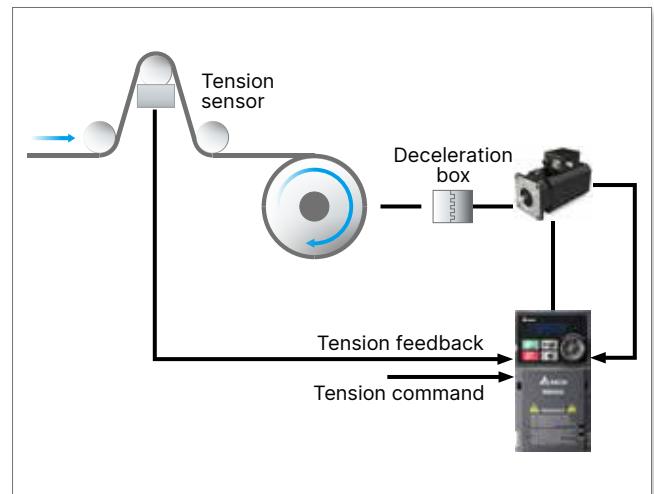

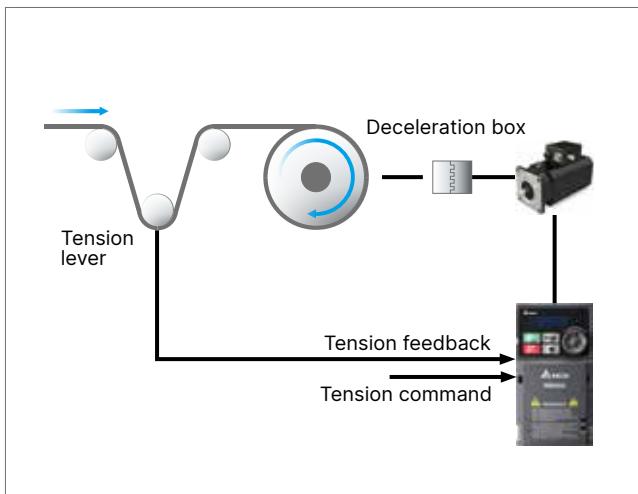

Tension Control

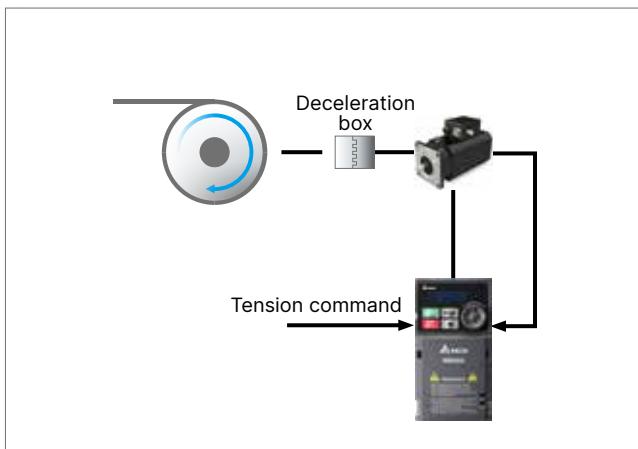

- Built-in coil diameter calculation: through linear velocity, material thickness, and range finder
- 2 PID parameter settings: supports linear adjustment to control tension at the start, between sizes and different linear velocities
- Tensile taper calculation: automatically adjust tension while wrapup to avoid crease folding or deformation
- Auto lap changing: on-power refueling with external signal Friction and inertia compensation during torque control: automatically compensate friction and inertia of rewinding and unwinding reels to maintain steady tensions

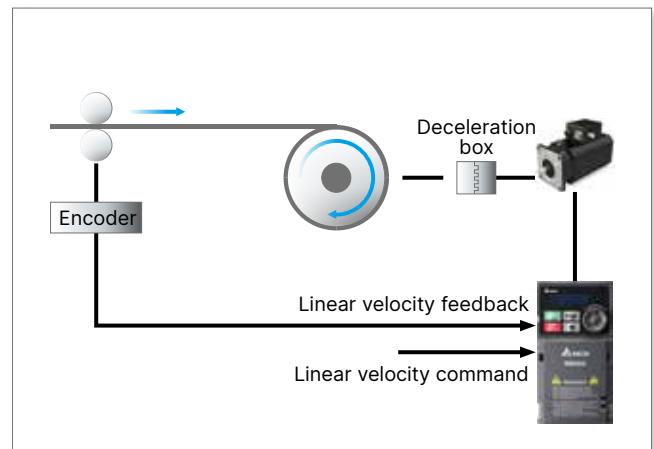

- Supports open/closed-loop, torque and speed tension controls
- Closed-loop tension, speed control
- Closed-loop tension, torque control

- Open-loop tension, torque control

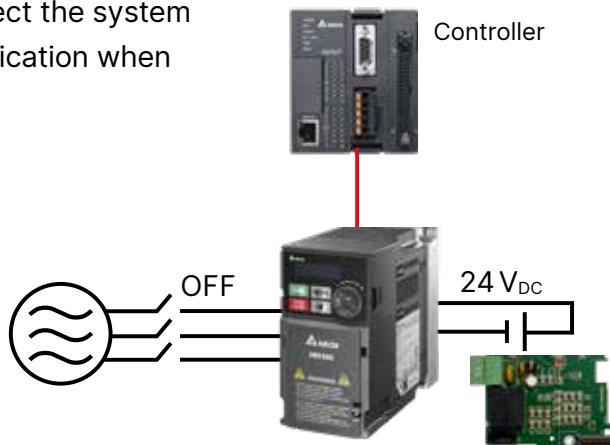

- Steady linear velocity control

DC 24V External Power

External power supply card is available for external power connection to protect the system and ensure uninterrupted communication when mains power failure occurs

High Overload Capability

- Normal duty: rated current 120% for 60 seconds; 150% for 3 seconds
- Heavy duty: rated current 150% for 60 seconds; 200% for 3 seconds

Built-in Braking Chopper

Larger braking torque capability is provided when using an additional braking resistor

Closed-Loop Control

Optional PG card is available to support closed-loop control function and to provide higher precision of motor speed control

Various Communications

Built-in RS-485 (Modbus) and CANopen communication; other communication options are available upon selection

Communication	
Modbus	Built-in
PROFIBUS DP	Optional
DeviceNet	Optional
Modbus TCP	Optional
EtherNet/IP	Optional
CANopen	Built-in
EtherCAT	Optional
PROFINET	Optional

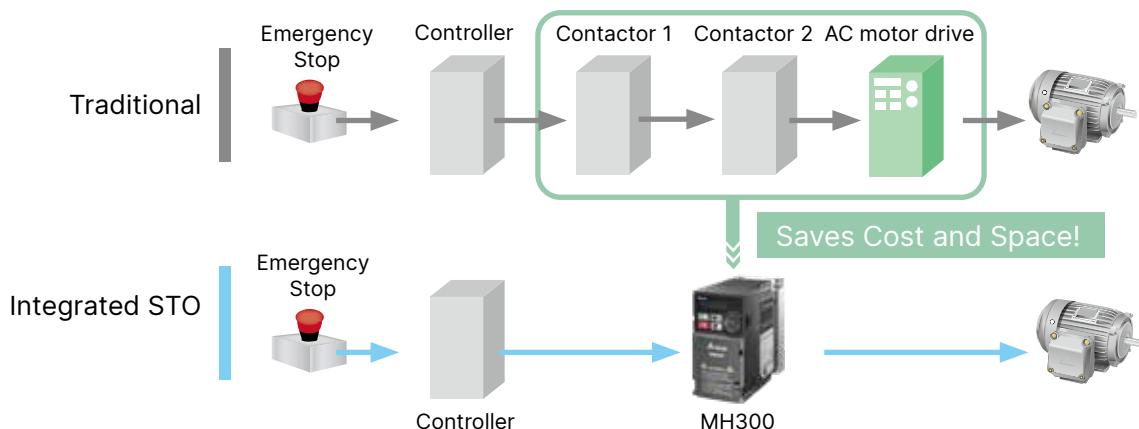

Stable, Safe and Reliable

Safety Standard

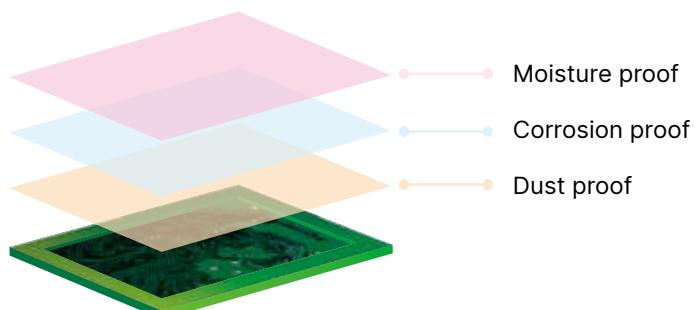

Integrated Safe Torque Off (STO), compliance with:

- ▶ ISO 13849-1: 2015 Category 3 PL d
- ▶ EN 61508 SIL2
- ▶ EN 60204-1 Category 0
- ▶ EN 62061 SIL CL 2

PCB Coating

100% PCB coating (IEC 60721-3-3 class 3C2 standard) ensures drive operation stability and safety in critical environments

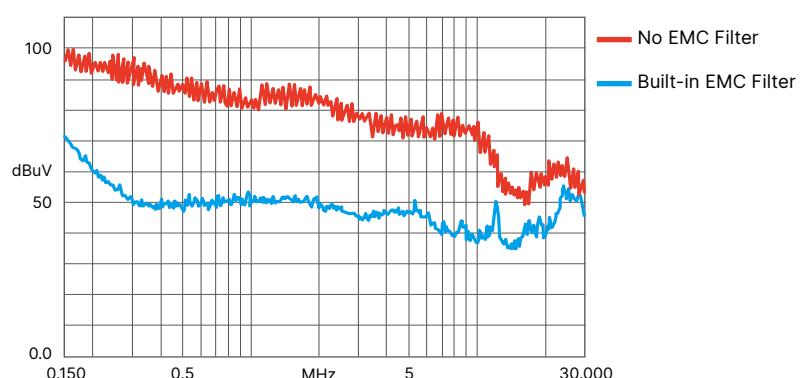

IP 40 Models

Strengthened fan coating and concealed air vent prevent dust and other particles from entering the drive, suitable for critical environment applications

Built-in EMC Filter

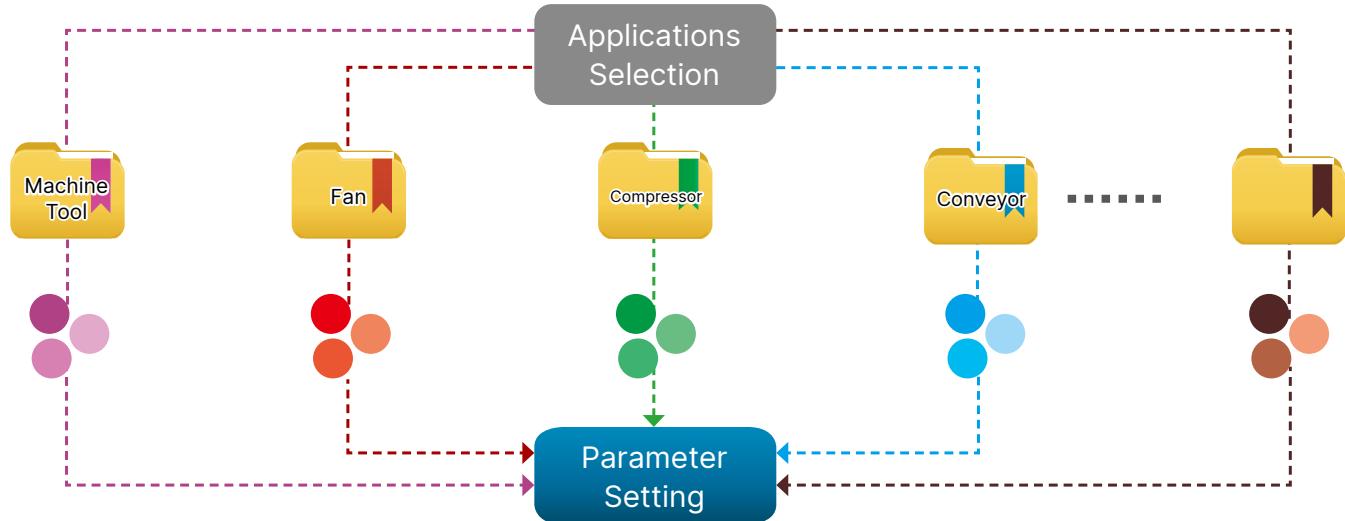

Built-in Class A (C2) standard EMC filter; saves on additional procurement cost and wiring time, and provides more cabinet space for other devices to use

Easy to Install

Application Groups (Macro)

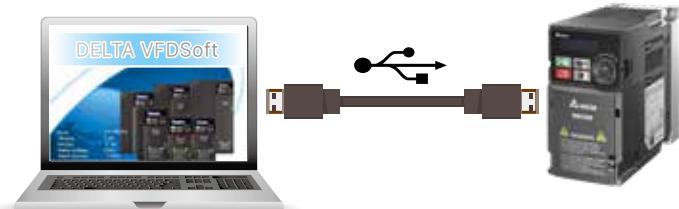

Simplifies the parameter setting process by grouping the parameters for different applications to use

Built-in USB Port

Built-in USB port facilitates the drive setting, updating, real-time monitoring and system tuning process

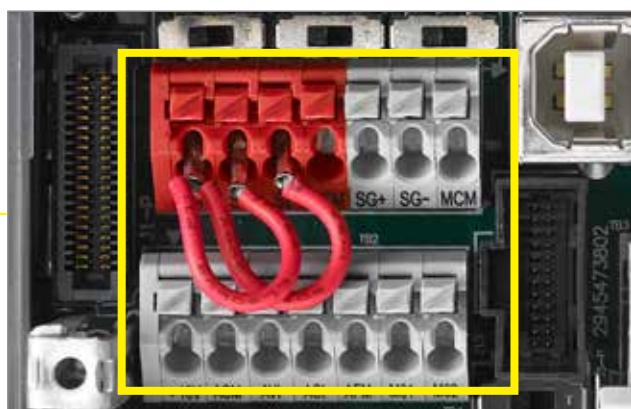

- ▶ No need of USB or RS-485 connectors
- ▶ Supports offline (drive power off) parameter setting/copying and system update

Screwless Wiring of Control Terminal

Spring clamp terminal blocks provide fast and easy wiring

No need for special tools
and saves wiring time

Wide Range of Applications

Rewinding Machines

Features and Benefits

- Built-in tension control features for timely response compared to the external controller (ex. PLC); stable tension with coil diameter calculation
- Built-in 2 PID parameter settings for stable tension through the whole production
- Built-in tensile taper calculation to automatically adjust tension while wrapup to avoid crease folding or deformation
- Supports common DC bus to decrease electricity consumption by recovering rewinding energy for unwinding

Slitter Machines

Features and Benefits

- Control by inverters overcomes the drawbacks of a magnetic powder clutch, such as low operating speed, high temperature, and short lifetime
- Timely acceleration/deceleration control improves machinery operation efficiency and supports weak magnetic control to increase slitter speed and save energy
- Automatically compensates friction and inertia of rewinding and unwinding reels to maintain steady tensions
- Supports both induction motors and PM motors

Printing Machines

Features and Benefits

- Built-in 2 PID parameter settings and coil diameter calculation for stable tension with big/small reels, and high/low linear velocity
- Built-in tensile taper calculation to automatically adjust tension while wrapup to avoid crease folding or deformation
- Auto lap changing for on-power refueling with external signal
- Supports common DC bus to decrease electricity consumption by recovering rewinding energy for unwinding

Drawing Machines

Features and Benefits

- Built-in master and sub-carrier frequency control with PID control enables quick response and stable tension to avoid line disconnection
- Low-frequency heavy torque fulfills the torque requirement during low speed and quickly complete threading
- 100% PCB coating to enhances the durability for humid, corrosive, and dusty environments

Coil Cutting Tool

Features and Benefits

- Easy and handy PID control fulfills the requirement of steady tension during high / low linear velocity and avoids belt or cable damages
- Features smart start control to avoid belt damage caused by excessive instantaneous tension during the start
- Built-in brake chopper saves system implementation cost
- Compact design for optimized space efficiency

Machine Tools

Features and Benefits

- Supports PG cards for closed-loop control; suitable for complex and high precision processing applications
- Timely acceleration / deceleration control improves machinery operation efficiency
- Built-in brake chopper saves on purchasing cost
- Built-in PLC capacity for flexible application needs
- Built-in STO function ensures operator safety and effectively reduces accident risk
- Provides deceleration-to-stop function

Woodworking Machines

Features and Benefits

- Timely acceleration / deceleration control improves machinery operation efficiency
- Built-in STO function ensures operator safety and effectively reduces accident risk
- Built-in PLC capacity saves on purchasing cost
- Built-in EMC filter effectively reduces electromagnetic interference
- Compact in size and weight, easy to install and maintain

Textile Machines

Features and Benefits

- IP40 models provide excellent protection from a high dust, fiber or moisture environment
- Improved heatsink design prevents fiber clogging the air way; modular design of fan is easy to clean and provides longer lifetime
- Improved braking capability shortens the deceleration-to-stop time and is suitable for sudden stop requirements
- Built-in STO function ensures operator safety and effectively reduces accident rate
- Supports both induction motors and PM motors
- Provides deceleration-to-stop function to protect the equipment from damage when sudden power failure occurs

Specifications

Single-phase
115V

Models w/o Built-in EMC Filter								
Frame			A		C

General Specifications and Accessories

Control Functions	Control Methods	V/F, SVC, FOC, V/F+PG, FOC+PG, TQC+PG	
	Applicant Motors	Induction motors (IM), Interior Permanent Magnet (IPM) motors, and Surface Permanent Magnet (SPM) motors	
	Max. Output Frequency	599 Hz	
	Starting Torque*	150%/3 Hz 200%/0.5 Hz 200%/0 Hz 100%/(1/20 of motor rated frequency) 150%/0 Hz 200%/0 Hz	(V/f, SVC, V/F+PG control for IM, Heavy duty) (FOC control for IM, Heavy duty) (FOC+PG control for IM, Heavy duty) (SVC control for PM, Heavy duty) (FOC control for PM, Heavy duty) (Closed-loop vector control w/PG for PM, Heavy duty)
	Speed Control Range*	1 : 50 (V/f, SVC, V/F+PG control for IM, Heavy duty) 1 : 100 (FOC control for IM, Heavy duty) 1 : 1000 (FOC+PG control for IM, Heavy duty)	1 : 20 (SVC control for PM, Heavy duty) 1 : 100 (FOC control for PM, Heavy duty) 1 : 1000 (Closed-loop vector control w/PG for PM, Heavy duty)
	Overload Tolerance	Normal Duty (ND): 120% of rated output current for 60 seconds; 150% of rated output current for 3 seconds Heavy Duty (HD): 150% of rated output current for 60 seconds; 200% of rated output current for 3 seconds	
	Frequency Setting Signal	0 ~ +10 V / -10 V ~ +10 V, 4 ~ 20 mA / 0 ~ +10 V, 2 Pulse input (33 kHz), 1 Pulse output (33 kHz)	
	Main Control Functions	multi-motor control motor switches (max. 8 independent motor parameter settings), fast startup, Deceleration Energy Back (DEB) function, wobble frequency function, fast deceleration function, master and auxiliary frequency source selectable, momentary power loss ride thru, speed search, over-torque detection, torque limit, 16-step speed (max.), accel/decel time switch, S-curve accel/decel, 3-wire sequence, JOG frequency, upper/lower limits for frequency reference, DC injection braking at start and stop, PID control, built-in PLC (5K steps), positioning function, tension control, Modbus and CANopen integrated as standard	
	Motor Protection	overcurrent protection, overvoltage protection, over-temperature protection, phase failure protection, overload protection, output grounding protection	
	Stall Prevention	stall prevention during acceleration, deceleration and running independently	
Accessories	Communication Cards	PROFIBUS DP, DeviceNet, Modbus TCP, EtherNet/IP, EtherCAT, PROFIENT	
	PG Cards	EMM-PG01L (ABZ, line driver) EMM-PG01O (ABZ, open collector)	EMM-PG01R (resolver)
	I/O Expansion Cards	EMM-D33A (digital card - 3 in/3 out) EMM-A22A (analog card - 2 in/2 out)	EMM-R2CA (relay card (output: A *3)) EMM-R3AA (relay card (output: A *3))
	External DC Power Supply	EMM-BPS02 (DC 24V power supply card)	
	Digital Controller	A removable keypad as standard	
	Certifications	CE, RCM, REACH, RoHS, TUV, UL	

*Control accuracy may vary depending on the environment, application conditions, different motors or encoder. For details, please contact our company or your local distributor.

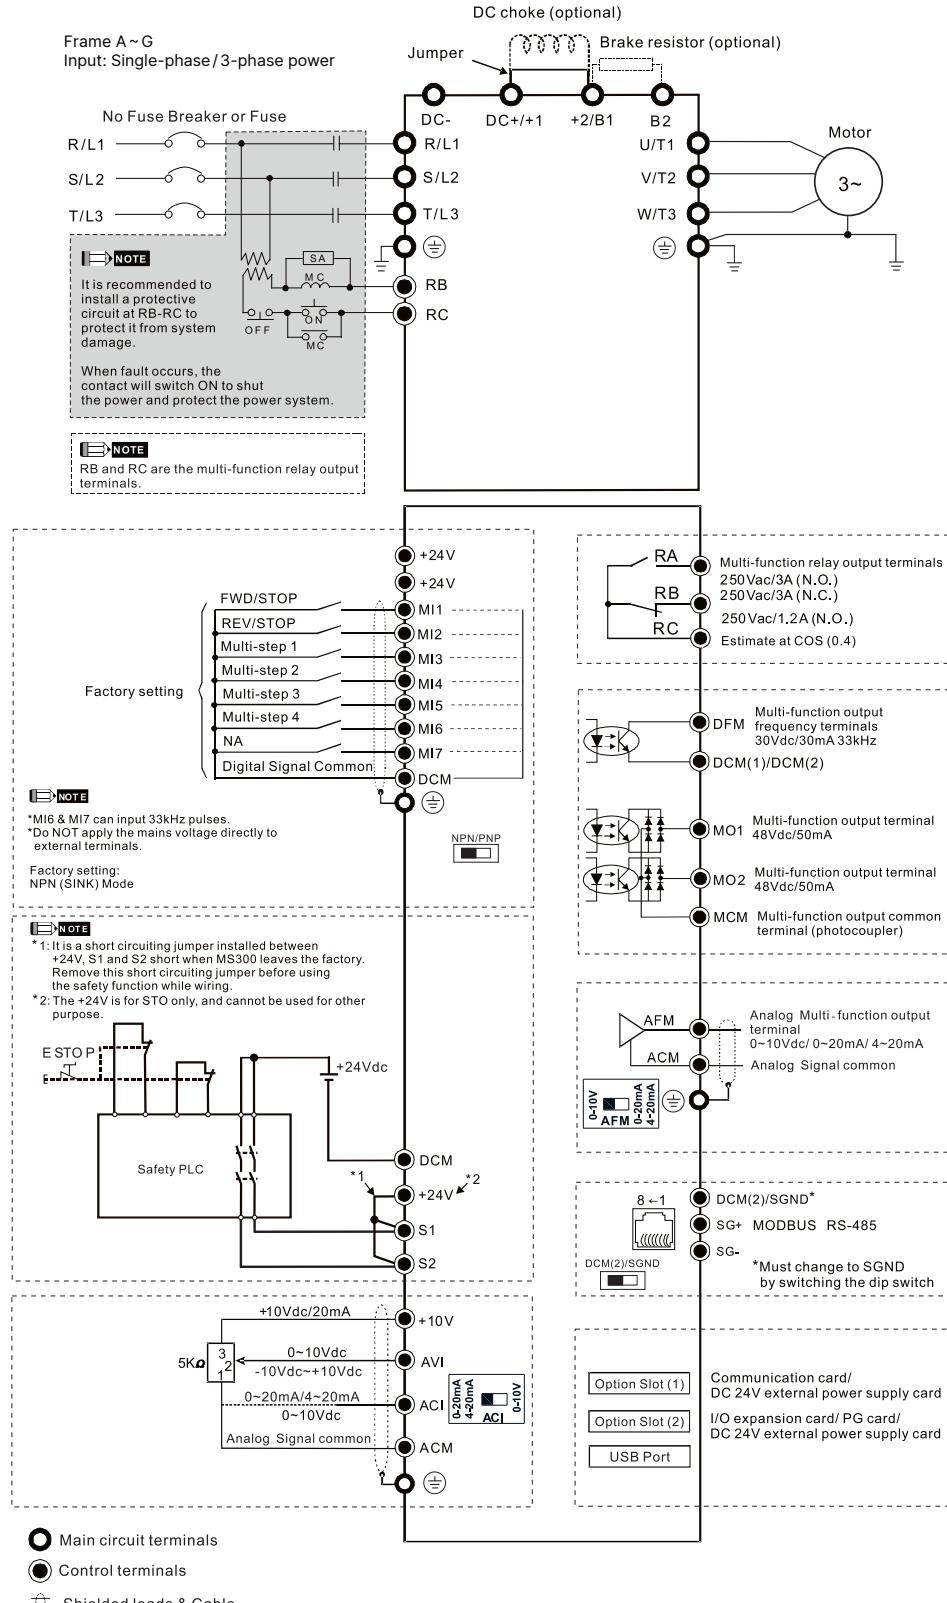

Operating Environment

Operating Environment	Installation Location	IEC60364-1/IEC60664-1 Pollution degree 2, Indoor use only	
	Ambient Temperature	Operation	-20 to 50 °C -20 to 60 °C (needs derating)
			-20 to 40 °C -20 to 50 °C (needs derating)
			Zero stacking Installation
		Storage	
		Transportation	
	Rated Humidity	Operation	
		Storage/Transportation	
	Air Pressure	Operation	
		Storage/Transportation	
Pollution Level	Compliance to IEC60721-3-3, 3C2		
	Altitude	An altitude of 0 ~ 1000 m for normal operation (derating is required for installation at an altitude above 1000 m)	
	Vibration	Compliance to IEC 60068-2-6	
Shock	Compliance to IEC/EN 60068-2-27		

Please refer to MH300 user manual for more details.

Wiring

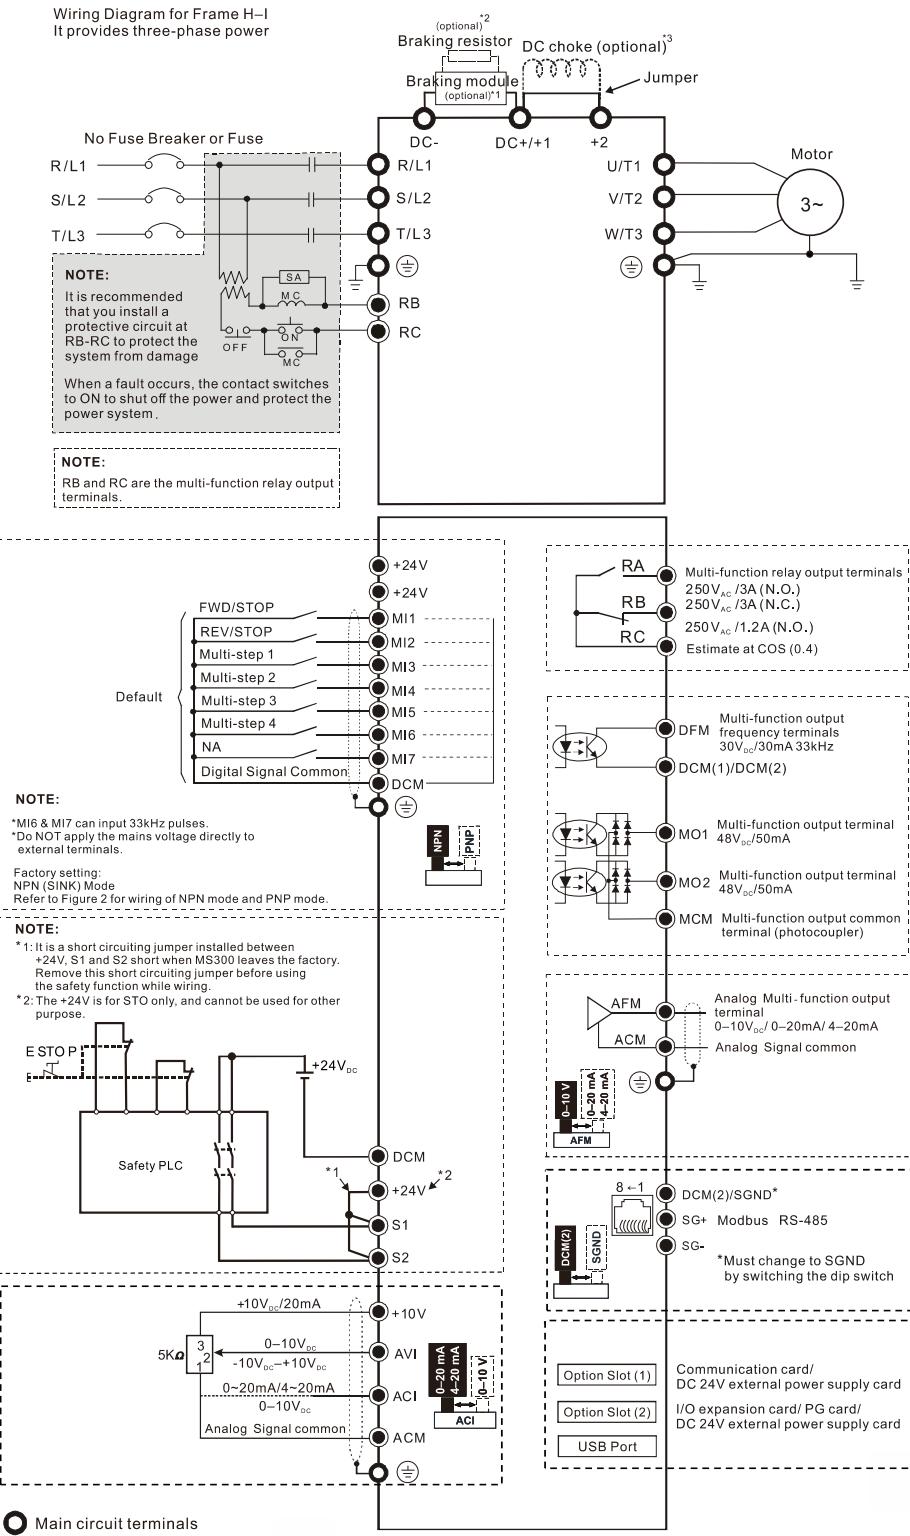

Input: Single-phase / 3-phase power

Note 1: please refer to MH300 user manual (chapter 7-4) for more details of DC choke
Note 2: please refer to MH300 user manual (chapter 7-1) for more details of brake resistor

Wiring

Input: Single-phase / 3-phase power

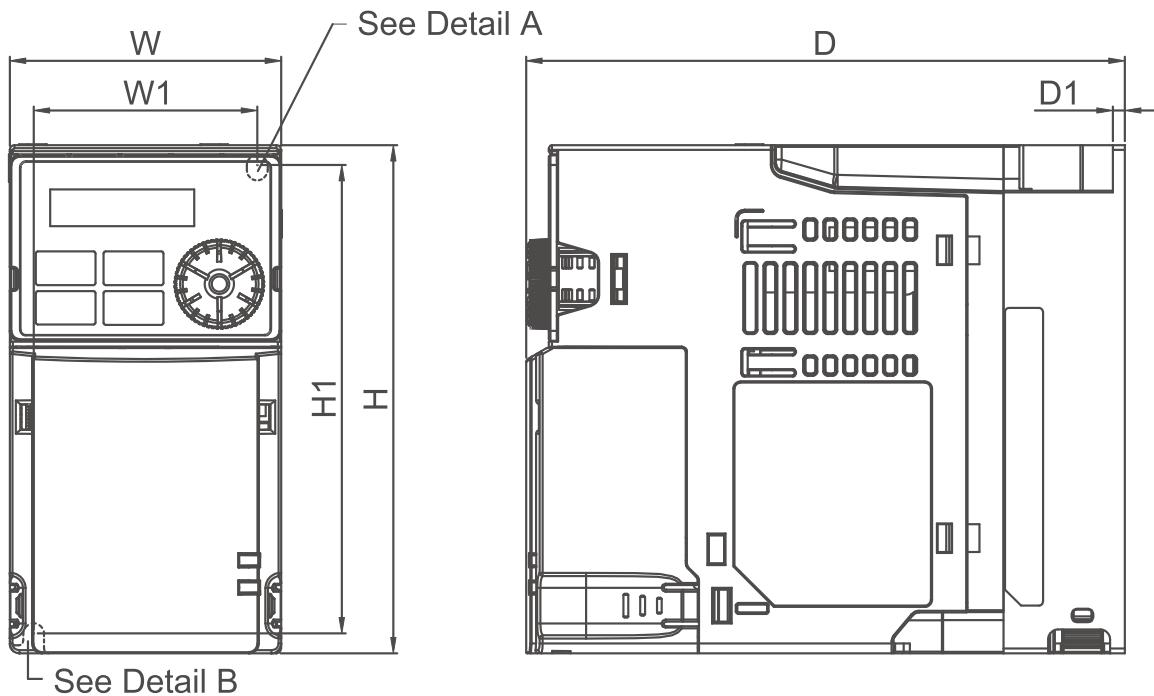

*1 & *2 Refer to Section 7-1 in the user manual for brake units and resistor selection.

*3 Refer to Section 7-4 in the user manual for DC reactor selection.
